Falling...

WEEKEND WORKSHOP IN FELDENKRAIS®-AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, APRIL 17/18, 1999

Falling down, falling in love, fear of falling, falling asleep, falling out of favour, falling apart, falling all over yourself...

What is it about falling that is so central to our experience that it can describe so many of our states?

This workshop will explore the theme of falling. What is the relationship between falling and safety, risk, creativity, enhanced abilities and a life that is a little bit easier?

Through *Feldenkrais*[®]-Awareness Through Movement[®] we will look at the benefits we may derive from a deeper understanding and experience of falling.

If the idea of falling concerns you, be assured that no demands will be placed on you that are beyond your abilities.

This workshop is geared towards participants of all levels of experience with *Feldenkrais*[®]– *Awareness Through Movement*[®] and of all ages who are seeking a more familiar relationship with the floor that carries us.

The Moment where we begin...

An Exploration between Intention and Action

WEEKEND WORKSHOP IN FELDENKRAIS®-AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND APRIL 8/9 2000, SECOND EDITION 2005

When and how do our thoughts and intentions turn into actions?

How often do we unknowingly create unnecessary work for ourselves?

How can we become more like we imagine ourselves to be? The significance of understanding these questions is key to accurately fulfilling our objectives in life.

Utilizing *Feldenkrais*[®]-*Awareness Through Movement*[®] lessons we will inquire into this moment between intention and action. By discovering how we initiate the things we do, we can improve our efficiency, reduce our discomfort and create a life more to our liking.

Moving Beyond Your Self-image

WEEKEND WORKSHOP IN FELDENKRAIS®-AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND JUNE 5/6 2004

Our self-image is defined by how we think, what we feel and what we do. How we perceive our world is colored by our personal history which influences our actions and behavior.

The limitations we experience in our life are often caused by ways of thinking, feeling, and doing that we were born into. To become more of who you would like to be is easier than you may imagine.

Feldenkrais®-Awareness through Movement® help you to perceive unknown aspects of yourself. In this workshop you will discover that it can be easy and fun to move beyond your self-image.

Reversibility...ytilibisreveR

WEEKEND WORKSHOP IN FELDENKRAIS®-AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, MAY 28/29, 2005

"If you know what you are doing, you can do what you want." M. Feldenkrais

So how do we come to "know what we are doing"?

Developing our awareness is the path to "knowing what we are doing". Reversibility is the keystone to "knowing what we are doing". It is when our actions become REVERSIBLE that we can truly say we have a choice in what we do and how we do it. Being able to more easily move from where we are...to where we are going...while being able to effortlessly change directions at any moment will be the focus of our inquiry.

Utilizing *Feldenkrais®-Awareness Through Movement®* lessons we will develop our capacity for "reversibility" and discover its impact on our actions, emotions and thinking.

Getting Hip

WEEKEND WORKSHOP IN *FELDENKRAIS®-AWARENESS THROUGH MOVEMENT®* PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, SEPTEMBER 23/24, 2006

Want to get hip, literally?

In movement this can be done through discovering your hip joints. Your hip joints are the key to easy and comfortable movement -- but they are also mysterious and hidden from our self-image.

To move from your hip joints is more than just a nice idea, it is an experience you can embrace and utilize more and more frequently in your daily life.

Discovering your hip joints and exploring their potential for movement can help you experience new possibilities for moving through your life with a comfort that you had previously only hoped for.

"Getting hip' is more than just , being cool'...it is finding an ease and grace for creating more enjoyment in all the things you do.

May The Force Go Through you

WEEKEND WORKSHOP IN FELDENKRAIS®-AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, APRIL 12/13, 2008

Making our lives easier, more efficient and more comfortable can emerge from a more efficient use of our skeleton, yet it is a hidden and relatively unperceived aspect of who we are.

The function of our skeleton is to bear weight and transmit force, however it is underutilized in our everyday use. Finding our skeleton can become a new way for us to interact with our environment.

Through *Feldenkrais*[®]-Awareness through Movement[®] we will discover how we can become more "skeletal", resulting in a new and more vital sense of ourselves in a truly foundational way.

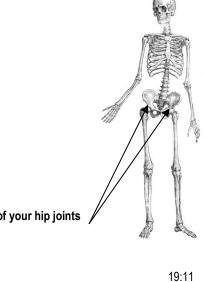

ONE 1) Intro and some of the ideas we'll be exploring 14:15 2) ATM 1: Using The Ground To Move Yourself 57:59 3) Discussion – Using ourselves in surprising ways / A change is how different we are from our habitual way of sensing ourselves 06:56 Total: 79:10 TWO 1) ATM 2: Turning Through The Top Of Your Head 30:45 2) Discussion - How novelty can affect us / The antagonistic relationship of our muscles / 05:03 Ben Gurion standing on his head 3) ATM 3: Rocking And Oscillating Through Yourself #1 43:27 Total: 79:15 THREE 1) Discussion - Stable ... mobile ... stable ... / Uncomfortable or unfamiliar 03:28 2) ATM 4: Minimal Lifting – Organizing Yourself At The Initiation 35:30 3) Discussion – Lots of ideas 21:39 Total: 60:37 FOUR 1) ATM 5: Impossible Lifting Or Possible Pressing 45:45 2) Discussion – And more ideas 04:58 3) ATM 6: Sitting to Stand With More Of Yourself 37:43 Total: 78:26 FIVE 1) Discussion – What changes / Reminding ourselves / The feeling of surprise and utilizing things 05:07 2) Discussion - What is a well organized movement / Feelings / Sympathetic vibrations 05:45 3) ATM 7: Rocking And Oscillating Through Yourself #2 43:22 4) Discussion – What if I don't feel something... 02:06 56:20 Total: SIX 1) ATM 8: Walking With Your Back... Balance

WEEKEND WORKSHOP IN FELDENKRAIS®-AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, OCTOBER 10/11, 2009

Balance (or the lack of it, describes how you are, both physically and emotionally. You know what it is...but what is it really? Balance is something you only really think about when you lose it. But do you know what you lose? Finding your balance is easier and closer than you think!

In this workshop you will experience some of the fundamental ideas that inform you about your balance as well as ways you can understand it, utilize it and play with it. You will discover how instability can become mobility and how immovability can become stability. Through Feldenkrais®-Awareness through Movement® lessons you will explore how it is you have balance, loose it and regain it again.

Getting Connected

WEEKEND WORKSHOP IN FELDENKRAIS®-AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, OCTOBER 20/21, 2012

The whole world is getting more connected...the internet...Facebook...everywhere we turn there seems to be another chance to connect to some one, for some reason, for some thing.

But what about getting more connected to your self? How can you become more successful at this? The connections within you are infinitely more exciting and engaging then you might ever have imagined. And when you become more connected with yourself... it's pretty likely that you will connect better with others!

In this weekend of Feldenkrais® - Awareness Through Movement® Lessons you will explore new ways you can become more connected to yourself...with yourself...through yourself. From the internal feeling of being connected...to the connection of movement through your skeleton.

Imagine a weekend where you continually get to click your own button! Come and get more connected!!!

The secret to moving better and better and better...

WEEKEND WORKSHOP IN FELDENKRAIS® - AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, MARCH 14/15, 2015

When you move well you feel better!

But how do you do it...how do you learn it...how do you maintain it? What if you did things more easily, more pleasurably, more effortlessly...without your usual aches and pains!

There are so many ways that we are told how to move correctly. But too often these ideas are just imposed on us and we rarely find comfortable ways of utilizing them.

What if you learned one simple idea that could help move better and better and better... in all of the things you do! That is exactly what we will explore and develop in this workshop!

Utilizing Feldenkrais[®] - Awareness Through Movement[®] Lessons you will learn how you can make everything you do...reaching, bending, sitting to standing and more...easier, more efficient and more comfortable.

What if? You knew how to adapt!

WEEKEND WORKSHOP IN FELDENKRAIS® - AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, MAY 7/8, 2016

What if you had a zillion dollars...what if you met the partner of your dreams...what if you could do whatever you wanted to do? What if were always words that were rich in my own fantasy life...until broke my leg skiing. I quickly discovered a deeper meaning to Moshe Feldenkrais' famous words: "Movement is life and without movement life is unthinkable."

What if you couldn't do what you wanted...what if you were constrained in some unexpected way...what if your movement choices were diminished?

And...WHAT IF YOU KNEW HOW TO ADAPT !?!

In this workshop, utilizing *Feldenkrais® Awareness Through Movement Lessons®*, you will discover how you can adapt, adjust and transform the difficult into the easy. You will come to understand how a limitation can be the means to new action. You will realize that the cup that seems half empty is actually half full of new possibilities.

WHAT IF YOU CAME TO THIS WORKSHOP... AND DISCOVERED ALL OF THAT... AND MORE!?! "Movement is life. Life is a process. Improve the quality of the process and you improve the quality of life itself." Moshe Feldenkrais

What is walking?

WEEKEND WORKSHOP IN FELDENKRAIS® - AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, MARCH 18/19, 2017

We all walk...a lot! The only other things we do more than walking are breathe, move our eyes and use our hands. But walking is much more than just putting one foot in front of the other (anyone who has been challenged in their walking will tell you that). And with all that walking we do, do we really understand it...?

In this workshop you will understand more of what you do when you walk and how you do it and find ways of walking that are easier, more efficient and more graceful.

Putting one foot in front of the other will take on new meaning with insights into how much the rest of you can be walking with you.

Breathe ...

WEEKEND WORKSHOP IN FELDENKRAIS® - AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, FEBRUARY 24/25, 2018

Breathing is a measure of your well-being. It's an indication of how you feel and is intrinsically connected to all of your actions, thoughts and feelings.

Breathing is the single thing you have repeated more than anything else in your life. Which makes it your most practiced habit...because 'how' you breathe is just that, it's a habit!

And this means it is something you can alter, change and become better at. Breathing is also something that has numerous 'rights and wrongs' attached to it. Rather than finding the single 'correct' way to breathe, through *Feldenkrais*® – *Awareness Through Movement*®, you will explore various aspects of breathing, what it is comprised of and how you actually do it.

Concrete things you can do and pay attention to breathe better beyond just inhaling and exhaling!

You will discover more choices in how you might breathe depending on your mood and the situations you find yourself in.

| ONE 1. Introduction - Humor / Liking yourself morekindness / The Feldenkrais Method / Breathing / How to do it 2. ATM 1 - New paradoxical breathing Total: | 17:40 57:33 75:13 |

Sitting Better!... How to use a chair... and more...

WEEKEND WORKSHOP IN FELDENKRAIS® - AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, MARCH 16/17, 2019

We sit...a lot! An article in Livescience cites studies that say sitting is killing us!

But we are all living longer...which means we are sitting even more...so what can we do?

Maybe we all sit too much, so as long as we are doing that...why not sit better! We live in a world of chairs but how well do we get in and out of them, sit or stay comfortable on them...and in any kind of chair? And what about the floor? When was the last time you were comfortable there? Sitting is more than just sitting! Sitting is not just a resting place, it's also a transition point. From standing to sitting, from sitting to lying and all the way back up again.

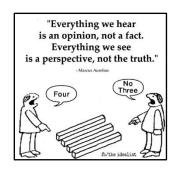

Come and understand how sitting is much more than your bottom resting on a surface.

In this workshop you will discover what helps you use any chair...sit anywhere...in a dynamic way...using more of yourself. Get more comfortable sitting in chairs...sitting on the floor. Get better at coming in and out of a chair, any chair, and get better at coming up and down from the floor. And all the things you do while sitting can get easier...reading, writing, eating and just hanging out! Come to this workshop because sit is going to happen...so why not do it well!

Perception...it's not what you think

WEEKEND WORKSHOP IN FELDENKRAIS® - AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, FEBRUARY 20/23, 2020

Perception is the ability to become aware of something through our senses; how we make sense of the world. It is through our perceptions that we develop perspectives of what we think, what we feel, how we act and define who we are. And all of this exists and occurs within your body and how you move. Sensing differences in yourself through movement is the vehicle to change how you feel, think and act...a kind of hidden treasure!

The ability to shift your perceptions...your perspectives, is the road of awareness. This shift can lead to new understandings, new insights and different ways of approaching your work, your relationships and your play. This road of awareness can guide you to fresh ways of thinking, greater creativity and the ability to see yourself and others in a new light.

Utilizing Feldenkrais® - Awareness Through Movement® lessons you will create new ways of perceiving yourself and the world around you...broaden your understanding of how you view things...and discover there are many more ways to see the world than you might have imagined... through movement you can change what you think, what you feel and how you perceive!

Your perceptions aren't necessarily what you think...they are just what you believe at this moment.

Classic Feldenkrais Lessons

COLLECTION OF *FELDENKRAIS*® - *AWARENESS THROUGH MOVEMENT*® LESSONS PRESENTED BY ALAN QUESTEL, 2021

Of the hundreds of Feldenkrais lessons that exist, some are considered classic.

This collection of lessons represents many of these classic lessons and will provide you with an understanding and experience of the range and applications of the Feldenkrais Method.

While each lesson is the context for your learning, probably more significant is 'how' you do the lesson.

- By approaching the movements with a sense of discovery, of finding out, rather than accomplishment.
- By doing the movements in a way that you move in a way that you like the way it feels.
- By never being too far from a smile.

Moving with these qualities will bring you to a fuller, richer and more complete appreciation of the Feldenkrais Method and even more important... a deeper, more expansive and more harmonious appreciation of your self.

Power and Strength and Effort

WEEKEND WORKSHOP IN FELDENKRAIS® - AWARENESS THROUGH MOVEMENT® PRESENTED BY ALAN QUESTEL IN LUCERNE, SWITZERLAND, MARCH 5/6, 2022

Power and Strength = effort...NO! Sorry, but it's actually not the case

One of the biggest confusions I witness in people is between power, strength and effort. When you feel effort, you think you are being strong and powerful. Most often, it is the opposite. While effort has its place, it's usually an indication of overworking or working inefficiently.

So how do you learn to distinguish between them?

The Feldenkrais Method® is all about making distinctions. About being more efficient and sensing yourself more accurately. It's about the transmission of force through your skeleton, which translates into less effort and more power.

In this workshop you will learn how to feel stronger and more powerful without working harder. You will discover that many of the things you do can be a lot easier than you thought.

Power and strength...most of us would like more of it. Effort...most of us would like less. Come and find out how!
